Information on the panel discussions during the high-level segment

The Subsidiary Body for Implementation (SBI), at its twentieth session, recommended that panel discussions be the mode for exchanges among ministers and other heads of delegation during the high-level segment. Four themes were also agreed.

The Bureau considered the details and format of the panel discussions among ministers and other heads of delegation. The following arrangements reflect the guidance received from the SBI and the Bureau on these matters.

The President has invited six panel members, as well as a moderator, to lead the discussion for each panel. There is a balanced representation among panel members, taking into account geographical representation and diversity of points of view.

The four panel discussions will be convened as follows:

It looks at recent emissions trends and prospects, and considers how concern about climate change fits in with strategies for sustainable development.

CCKIOSK

Colourful graphs, charts and photographs accompany the text.

Copies of "The First Ten Years" are available from the Climate Change Kiosk following the close of the opening meeting. The publication can also be downloaded from the UNFCCC web site: <unfccc.int>.
