

Article 6 Capacity Building

Nadine Nimal

Team Lead

Article 6 Capacity Building

United Nations
Climate Change Secretariat

Background

Mandated by the Parties to the Paris Agreement to deliver capacity building support to the Parties on Article 6

Responding to the needs

Regional Engagement

- Greater engagement at the regional level, to have a better knowledge of regional circumstances, trends and priorities
- Graduated approach to CB programming

Responsiveness

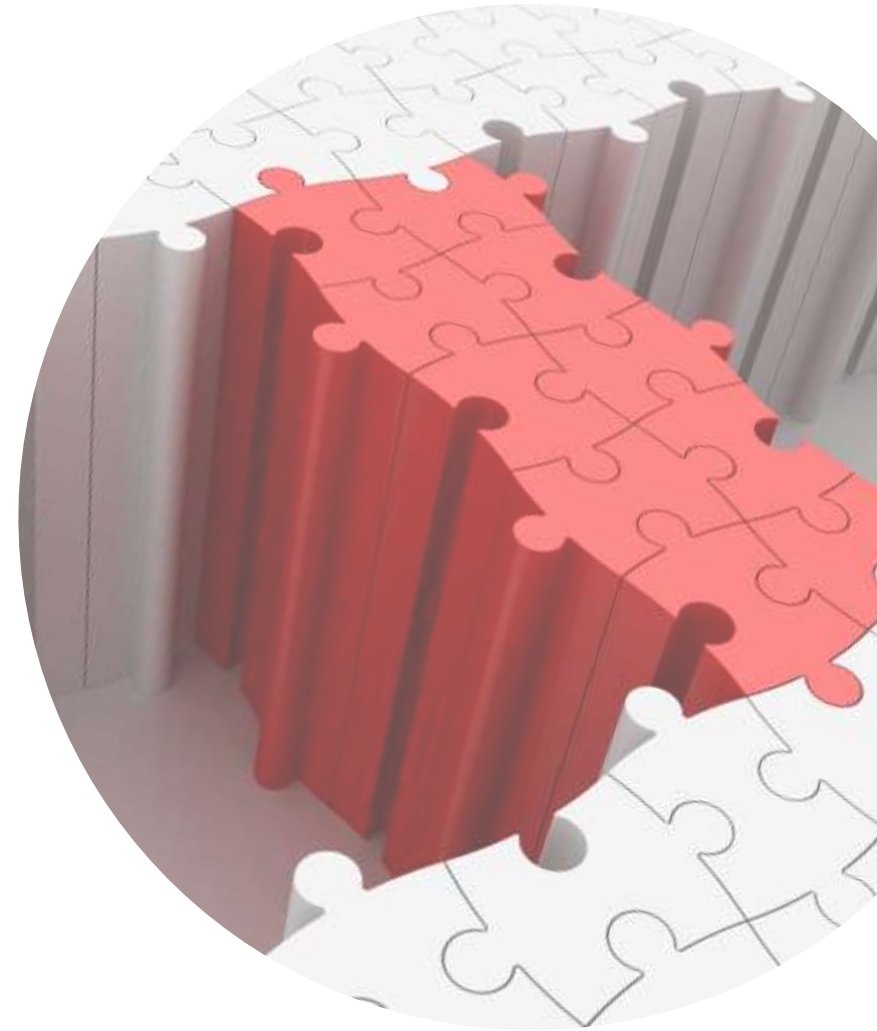

- Consultative and need-driven
- Technical and operational capacities at Secretariat and RCCs

Diverse support models

- Workshops and webinars are an important medium, but the portfolio will expand to include more online courses, explainers, guidebooks, and knowledge products for various levels of expertise and topics.

Collaboration and Partnerships

- Collaboration with governments, multilateral and international partners
- Knowledge-sharing, synergizing efforts, and maximizing effectiveness

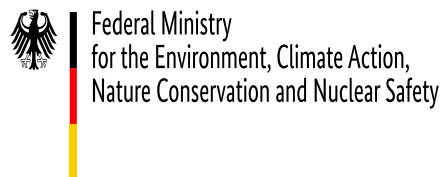

Engagement with Partners in Capacity Building Activities

Internal Partners

Key External Partners

.. and more

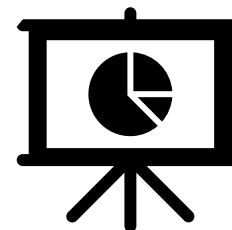

Key outputs 2024 -25

MAIN KNOWLEDGE PRODUCTS

- Navigating Decisions for International Carbon Markets, in collaboration with the World Bank and other partners.
- Article 6.4 Manual for Host Party Participation in the PACM
- Article 6.4 HPP Explainers
- E-Learning Module on Article 6 as part of the Mastering Climate Negotiations Course

WORKSHOPS AND WEBINARS

- More than a 120 Capacity Building events organized by the Secretariat, including those with the RCCs
- These include Webinars, Workshops, In-country Support
- 8 Regional Workshops on Article 6 and Carbon Pricing covering more than 90 countries since June 2024.
- More than 100 DNAs and stakeholders trained on Article 6 operationalization.
- More than a 6000+ reached through inputs at partner's events across different stakeholder groups.
- Article 6.2 Technical Expert Review Training

UNFCCC Secretariat's Article 6 Capacity Building Strategy

- Enhancing infrastructure and knowledge base.
- Well-structured, understandable information for diverse stakeholders.

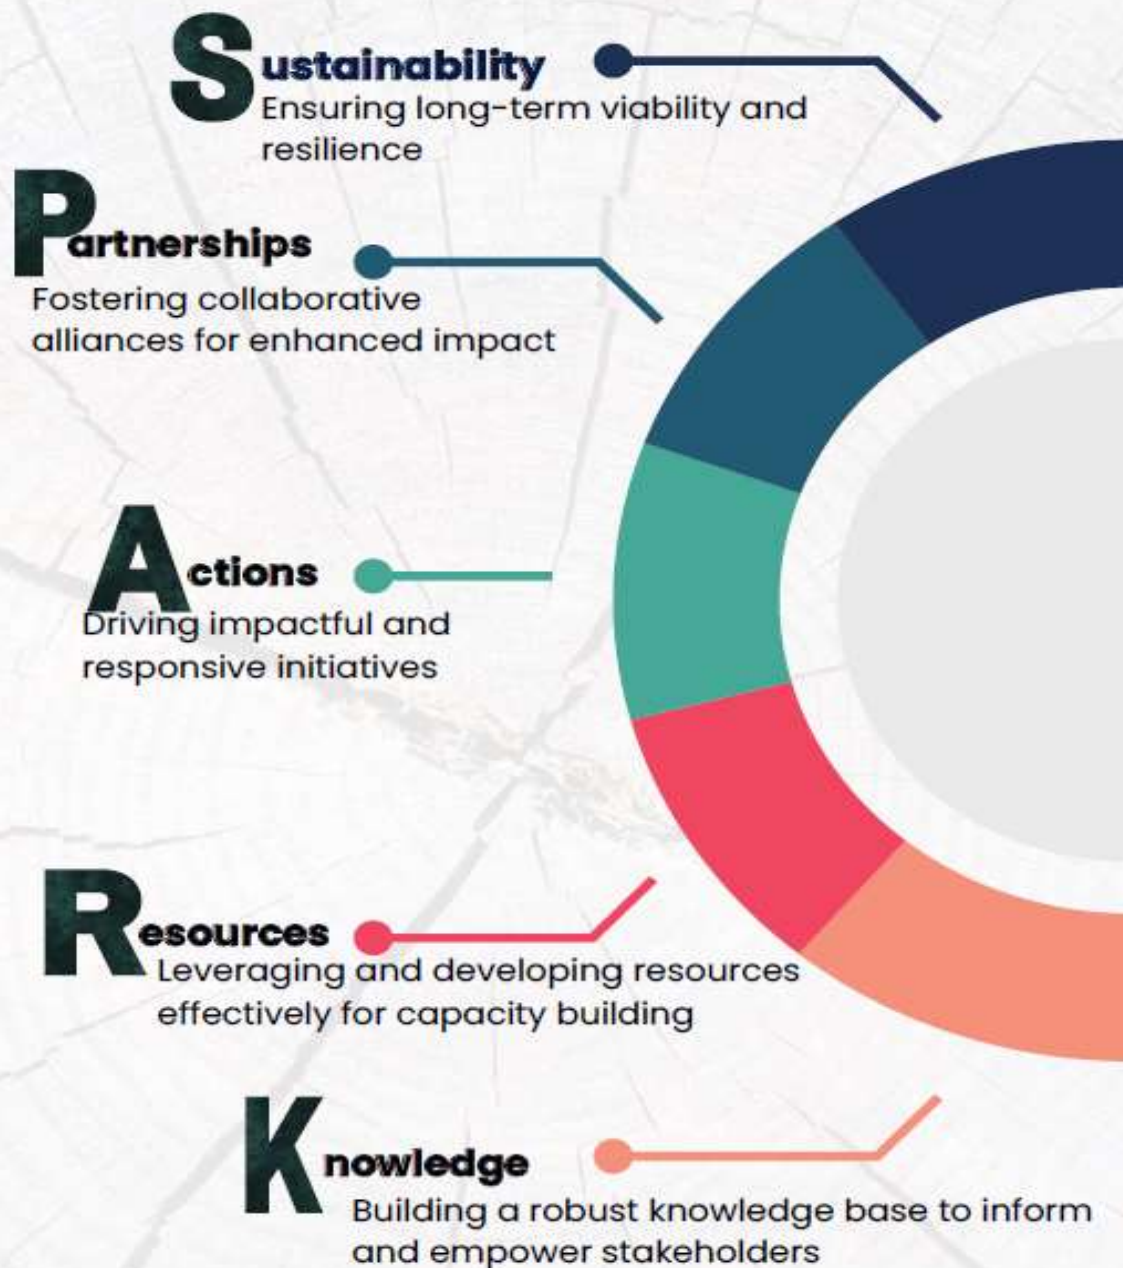

- Customized technical support.
- Services, events and products.
- Graduated approach and progress tracking.

- Training critical masses of carbon-pricing experts and other stakeholders.
- Collaboration across countries and sectors to ensure systematic and sustained capacity-building.
- Integration for enhanced impact.

- Clustering – thematic, needs based & geographical
- Accessible guidance on latest developments, including methodologies (e.g. baseline-setting), institutional arrangements, reporting, amongst others.
- Targeted assistance to LDCs and SIDS.
