Subject: Public Comment on Article 6.4

Dear Sir/Madam,

I am writing to provide my public comment on Article 6.4 of the United Nations Framework Convention on Climate Change (UNFCCC). As a concerned citizen, I believe it is crucial to incorporate innovative carbon removal technologies like CarbonRun's River Alkalinity Enhancement into the framework.

CarbonRun is a company dedicated to addressing the challenge of carbon removal and climate change. We focus on enhancing alkalinity in rivers to remove carbon dioxide from the atmosphere. Through the strategic deployment of alkaline materials, CarbonRun promotes natural chemical reactions that sequester CO₂, contributing to long term carbon removal. With a commitment to expertise, technology, and partnerships, CarbonRun strives to make a measurable impact in the fight against climate change, working towards a sustainable and carbon-neutral future while delivering environmental benefits.

These technologies offer promising opportunities to enhance carbon removal efforts, restore ecosystems, and achieve climate goals. By carefully evaluating and integrating new solutions, subject to rigorous assessment and verification, we can accelerate progress towards a sustainable future.

To strike a balance between innovation and environmental integrity, I urge the establishment of robust monitoring, reporting, and verification protocols. Collaboration among scientific experts, policymakers, and stakeholders is essential to ensure long-term effectiveness and sustainability. Furthermore, it is crucial to foster research and development in carbon removal technologies, promoting investment and collaboration for breakthrough advancements. By embracing innovation, we can revolutionize our fight against climate change.

I urge the UNFCCC to consider the incorporation of new technologies like CarbonRun's River Alkalinity Enhancement in the guidelines for Article 6.4. Let us harness the power of innovation and rivers to maximize carbon removal effectiveness and accelerate the transition to a sustainable future.

Thank you for considering my comments. I trust that you will carefully review and incorporate these perspectives into the ongoing discussions on Article 6.4, paving the way for a more sustainable and resilient world.

Sincerely,

Luke Connell
CEO & Co-Founder
