

Supplementary information to the Technical Guide on accessing financial resources aimed at averting, minimizing, and addressing the impacts of displacement associated with the adverse effects of climate change

The table below provides information on projects and activities submitted by members of the Task Force on Displacement and other partners through a dedicated survey. This information was collected to inform the preparation of the Technical Guide. The list was compiled in May 2025 by expert members of the Task Force on Displacement who co-led the development of the guide.

Each entry includes information on the following: implementing organization; name of activity/project and location; focus within mobility (migration, displacement, planned relocation); area of work (addressing drivers, preparedness, durable solutions, migration for adaptation); types of intervention (data, capacity-building, infrastructure, policy, finance, equipment) and beneficiary groups (people at risk, displaced persons, people on the move, governments); typical focus of donor and financial instrument used (grants, pooled funds, voluntary contributions, trust fund allocations).
