

Name of submitter: Juan D. Pierre, Reeshabh Shayan Tupsee, Zakiyyah Bibi Azraa Mungroo

Affiliated organization of the submitter (if any): UNESCO IPL Experts & Climate Solutions International

Contact email of submitter: ceo.nscmauritius@gmail.com , vp.nsc.mauritius@gmail.com

Date: 12 July

A6.4-MEP002-A01 (v.01.0)			
1	2	3	4
Section no.	Para. no.	Comment	Proposed change (Include proposed text)
3.2	14	The standard should include gender features when evaluating the member countries' policies on additionality.	Add: "Mechanism methodologies shall consider gender-differentiated impacts of national policies on additionality, recognizing that policies may affect men and women differently."
4.1	16	The regulatory analysis should include consideration of gender biases in regulations.	Add: "(d) Consider potential gender biases in the formulation and enforcement of regulations that may impact additionality assessments."
5.3	36	Financial viability analysis should consider gender differences in access to finance.	Add: "The analysis shall consider gender-differentiated access to finance and economic opportunities that may affect the financial viability of mitigation activities for different genders."
5.5	46	Barrier analysis should explicitly include gender-specific barriers.	Add: "(d) Gender-specific barriers that may prevent certain genders from implementing or benefiting from mitigation activities."

I've also attached my team and my profile for background check:
