

United Nations
Climate Change

28th meeting of the Adaptation Committee

Agenda item 3

Report back on accomplished and finalized work

Update by the Co-Chairs on work
accomplished since AC 27

Bonn, Germany

15–19 September 2025

Participation in the June Climate Meetings

- ✓ In-session technical workshop to facilitate the design of gender action plan activities;
- ✓ In-session workshop on systemic and holistic approaches to implementation of climate action on agriculture, food systems and food security, understanding, cooperation and integration into plans;
- ✓ 2025 Ocean and Climate Change Dialogue;
- ✓ ACE Dialogue;
- ✓ Global Center on Adaptation's consultation on adaptation education;
- ✓ Submission of written input to the 9th meeting of the informal coordination group for capacity-building under the Convention and the Paris Agreement.

Participation in regional Climate Weeks 2025

- ✓ Latin America Climate Week: 19–23 May 2025, Panama City, Panama
- ✓ Africa Climate Week: 1–6 September 2025, Addis Ababa, Ethiopia

AC's technical session at NAP Expo 2025

Navigating the landscape of support for the process to formulate and implement NAPs

- Training to participants on the landscape of support on the basis of the AC's online tool
- Panel discussion on the GCF's role within the landscape of financial support and country experiences in identifying support opportunities for NAPs
- Practical exercise to collect feedback from participants on how best to update and further develop the online tool

State of Adaptation Action by Parties

United Nations Climate Change

THE ADAPTATION COMMITTEE'S INTERACTIVE PORTAL ON

THE STATE OF ADAPTATION ACTION BY PARTIES

State of Adaptation Action by Parties

This portal of interactive country profiles is a product of the Adaptation Committee and showcases the state of adaptation (SoA) action in each country that is a Party to the United Nations Framework Convention on Climate Change (UNFCCC). The country profiles provide information on adaptation action undertaken along the adaptation cycle and are based on the latest information available in national reports and communications submitted to the UNFCCC.

As a unique, central access point for information, this portal is designed to enhance the collective understanding of adaptation action, facilitate recognition of adaptation efforts, stimulate learning and further action, and contribute to the tracking of adaptation progress globally.

Country profiles are updated on a rolling basis to reflect the latest submitted national reports and communications.

Each country has been provided with the opportunity to validate the information contained in its profile. More information on the methodological approach taken to develop the profiles and on the validation process can be found here: [SoA_methodology.pdf](#). If you discover any inconsistencies within the profiles or have any recommendations for further enhancing the portal, please contact the Adaptation Committee via ac@unfccc.int.

If you would like to filter countries according to specific profile items, please select the respective filters below.

If you are interested in a specific country profile, please select the country from the list on the right and click on the 'Country Profile' button.

Country list

- Search
- Afghanistan
- Albania
- Algeria
- Andorra
- Angola
- Antigua and Barbuda
- Argentina

198
Total number of countries that match selected filters

KEY HIGHLIGHTS

- Comprehensive and validated information on national adaptation arrangements and actions for all 198 UNFCCC Parties
- A wide range of filtering options allowing you to quickly access the information that you are interested in
- A non-exhaustive list of external portals which provide complementary information on adaptation

The Adaptation Committee's portal of interactive country profiles showcases the state of adaptation arrangements and action in each country that is a Party to the UNFCCC. The country profiles provide information on action undertaken along the adaptation cycle and as available in national reports and communications submitted to the UNFCCC.

As a unique, central access point for information, the portal is designed to enhance the collective understanding of adaptation, to stimulate learning and further action, and to contribute to the tracking of adaptation progress globally.
